“Among the real world work experience of many of my professors added such relevance and current workplace issues to the classroom setting. Then, when challenges arose later in my own working life, I was able to pick up the phone and call my professor for advice. That is, to me, what makes Chatham University’s MBA program and Chatham’s community unique. Peers and professors can be continual sources of resource and support, even after the semesters are over.”

– Julie Arnheim, MBA Student

“When I decided to continue my education, Chatham was my only choice. I knew I would receive a first class education, but never in my wildest dreams did I expect my life to be so enriched. I have gone from being a scared woman to become the president of a student association that embraces the returning or transferring non-traditional student. I contribute my success at Chatham to the whole Chatham community, starting with the President and encompassing the faculty, staff, and students.”

– Deborah Lyles, Undergraduate Student

Chatham University’s Enterprise Program is located north of Pittsburgh in Richland Township. A gift from Eden Hall Foundation to Chatham University, the Eden Hall Farm Campus supports a variety of educational, environmental, women’s leadership, and community programs. Amenities on the 388-acre campus include a conference and retreat center, the Sebastian Mueller House, swimming pool, bowling alley, and trails.

Originally assembled by Sebastian Mueller, one of the first executives at the H.J. Heinz Company, Eden Hall Farm served as Mr. Mueller’s summer estate and a retreat for generations of the company’s working women. Eden Hall Foundation donated the property to Chatham University on May 1, 2008. Chatham honors the legacy of Sebastian Mueller by creating an academic retreat that will allow community members to expand their horizons and explore their potential.
